Dear

Update on Galloper Wind Farm – Development Consent Granted

I am writing to you in relation to the Galloper Wind Farm project, a proposed offshore wind farm located off the Suffolk Coast. At the end of May 2013, Galloper Wind Farm received Development Consent from the Secretary of State for Energy and Climate Change. This allows the joint venture partners, RWE npower renewables and SSE renewables, to build the wind farm which could meet the energy needs of hundreds of thousands of UK homes each year and create up to 850 jobs during construction.

The granted Development Consent Order sets out certain 'requirements', which are the Order's equivalent of traditional 'planning conditions', the details of which we are currently submitting to and seeking approval from Suffolk Coastal District Council, in consultation with statutory bodies such as the Environment Agency, Natural England and English Heritage.

We have now submitted for approval the necessary plans to allow preliminary works known as Enabling Works to start. These Enabling Works could start in September and will include site clearance and earthworks to prepare the site for initial electrical construction works to start in 2014. We have also recently commenced ground investigations and ecological mitigation activities.

In addition to the requirements, we have also prepared a draft Traffic Management Plan and a draft Local Liaison Plan to discuss and agree with Suffolk Coastal District Council and Suffolk County Council. All of these plans are available on the Galloper website for you to view.

Further details regarding future stages of works will be submitted to the Council(s) at the appropriate time and we will keep you updated where possible.

If you wish to discuss the content of the plans or would like more information about Galloper Wind Farm, would like to hear from you. Please do not hesitate to contact us on **0845 078 2941**, by email at: galloperwindfarm@rwe.com or by post to our Swindon address. For more information on Galloper Wind Farm, please visit: www.galloperwindfarm.com.

Yours faithfully,

Galloper Wind Farm Communications Team
