

Innogy Renewables

Asset Integrity Electrical Engineer

We are looking for an outstanding and experienced Asset Integrity Electrical Engineer to join our new team based at Galloper Wind Farm in Harwich.

Galloper is a 340 megawatt (MW) Offshore Wind Farm located within the outer Thames Estuary 27km off the Suffolk Coast. We have a dedicated Offshore Operations and Maintenance (O&M) Implementation function and are increasing the team to meet the requirements of this project.

Role description

You will assist in the operation and maintenance of the wind farm assets, maintaining 56x6 MW wind turbines, offshore substation, onshore substation and a 24hr control facility installed at the Wind Farm. You will be directly responsible for the Electrical maintenance of the assets giving technical input to and making decisions and analysis which will protect asset integrity and wind farm revenue.

Critical operating decisions will be required daily to protect and where possible optimize all revenue. Highest standards of Safety and Quality will need to be maintained at all times alongside a need to be flexible in your approach to work with a collaborative approach when working with contractors.

Skills and experience

- Electrical engineer experienced in power generation or heavy engineering environment
- BEng or MEng preferred
- Analytical approach to problem solving
- Comfortable to be working in isolation and able to plan your own workload
- Excellent communication skills
- Experience of working in a multi-contract installation
- Specific Electrical Engineering experience with Wind Turbines or Siemens Electrical equipment
- OPITO approved Offshore sea survival training – Desirable

Why work for us

As well as a competitive salary and impressive benefits package you'll also get the opportunity to really shape the future of our business. Along the way we'll give you all the support you need to develop your skill set and achieve your long term ambitions.

Salary: Competitive plus bonus and benefit

ALL CANDIDATES MUST LIVE WITHIN AN HOUR OF THE FACILITIES AND BE WILLING TO RELOCATE IF NEEDED

Please apply online by selecting the 'Apply' button and uploading your CV directly. Applications will only be accepted via the 'Apply' button.

innogy SE is an established European energy company. With its three business segments Grid & Infrastructure, Retail and Renewables, it addresses the requirements of a modern, decarbonised, decentralised and digital energy world. The focus of innogy's activities is on offering existing and potential customers innovative and sustainable products and services which enable them to use energy more efficiently and improve their quality

of life. The key markets are Germany, the United Kingdom, the Netherlands and Belgium as well as several countries in Central Eastern and South Eastern Europe, especially the Czech Republic, Hungary and Poland. In renewable power generation, the company is also active in other regions, e.g. Spain and Italy. The subsidiary of RWE AG started operations on 1 April 2016. The innogy brand name is a symbiosis of the terms innovation, energy and technology.

The logo for innogy, featuring the word "innogy" in a bold, lowercase sans-serif font. A stylized yellow and orange graphic element is positioned above the letter 'y'.

Based on the combined financial statements for 2015, the company achieved a revenue of around €46 billion and an EBITDA of €4.5 billion. The company is expected to employ around 40,000 out of a total of around 60,000 employees of the RWE Group once the restructuring process has been completed

Agencies: RWE operate a preferred supplier arrangement, however if you wish to be considered at the next review session please submit a brief overview of your capability to pslreviewrecruitment@npower.com.
